NUMBER 4

JUNE 21, 1973

Rare Honour

Grant Thompson, Vice-President (Finance) for Lakehead University, was elected Fellow of the Canadian Institute of Chartered Accountants at the Annual Meeting of the Institute of Chartered Accountants of Ontario, which was held in Toronto on June 25. Mr. Thompson was one of 58 chartered accountants to be so honoured, first since 1970. The honour will be formally bestowed at a special reception at the Granite Club in Toronto.

Mr. Grant Thompson

Mr. Thompson graduated as a CA in 1956, joining the Thunder Bay firm of F.H. Black and Company, now the Clarkson-Gordon Company. He became a partner in the firm, but left to become Comptroller at Lakehead University on July 1, 1966. He became Vice-President (Finance) in January, 1973.

Entrance Scholarships

The Council of Ontario Universities has discussed at length the recent trend for universities to introduce new or expanded programmes of entrance scholarships. Although there was general support for the desirability of attracting to the universities more students of high ability, it was recognized that entrance scholarships could have the desirable effect of causing students to alter their first choice of university, thus denying the original university both good students and the government income attached to them. Such a situation was viewed as representing an undesirable and unnecessary competition which would aim at in-

fluencing students' choices on financial grounds. Consequently, the Council passed a resolution which calls for the university shown as first choice on a student's application on May 18 (the collectively agreed first date for offers of admission) to retain the formula grant for that student even if the student subsequently accepts another university's offer and receives an entrance scholarship at that university. The Council is asking all boards of governors to agree to this arrangement for one year only. The Council will provide a clearinghouse function to redistribute income to accomplish the objective.

Correction

Last issue included an error and an omission in the "Special Awards" article. Correct information is as follows:

Dr. D. Eldon, Vice-President (Academic), presented the *Lieutenant-Governor's Medal* to Helen D. Keller, B.Sc., for the highest ranking graduating student of the third year of the Bachelor's degree. Dr. A.D. Booth, President, presented the *Governor General's Medal* to Man-Yuen Wong, B. Sc. (Hons.), for the highest ranking graduate in the graduating class of the Honours degree.

National Training Camp

Gord Garvie of Lakehead University, Manager of the 1973 Canadian Wrestling Team which will compete in Moscow August 15-25, has announced that the team will train at Lakehead University from July 28 to August 9. The national team's stay in Thunder Bay will be interrupted for a 4 day period during which time it will travel to Minneapolis to work with the American national team.

The main try-out camp will be held in London, Ontario, July 20-27. During that period the Canadian Senior team will be named and a Junior team sent to Miami for the Junior World Championships. The Senior National Wrestling team will then fly to Thunder Bay and work out at the C.J. Sanders Fieldhouse.

Area wrestlers who will travel to London for the try-out camp are to date: Brian Renken (Lakeview), Andy Connell, Greg Koza, Lindsay Koze (Selkirk); Kim Dudley (Churchill) and Frank Troughton of Dryden. These wrestlers are all of junior age. Lakehead University wrestlers who will try for the student and senior teams are: Mitch Kawasaki, Cheyenne Ashukian, Dennis Marshall, Grant Lavallee, Don Roy, Elvin Martin (who represented Canada in the World Cup), Richard Beauparlant and Terry Paice. Paice is eligible for the Junior team as well as the Senior and Student team.

Sports Coordinator

Dick Henderson, recent recipient of the President's Award for his outstanding work with intramural athletics over the last few years, has been appointed sports co-ordinator for the Northwestern Ontario Sports Council.

The Council is a volunteer organization with broad purpose of promoting and developing athletic and competitive competence among coaches and youth in the region. Acting president of the Council is Don Domansky, computer analyst at Lakehead University; the treasurer is David Cain of the Parks and Recreation department of Thunder Bay; and Struchan Gilson of Fort Frances is the Council secretary. The Council has received a grant through the Sport and Recreation Branch of the Ontario Ministry of Community and Social Services for the purpose of financing the co-ordinating operation.

It will be Mr. Henderson's responsibility to develop and maintain liaison with individual groups and organizations who are interested and involved in athletic programmes throughout the region. Part of his purpose will be to determine the demand and requirements for coaching clinics and workshops throughout Northwestern Ontario, and to recommend experts in the various fields of athletics to act as consultants, workshop directors, and leaders for coaching clinics and seminars.

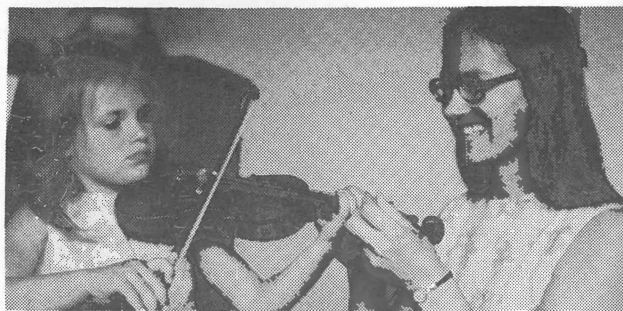

Continuation of provincial support for the work of the Council will depend upon the response of the people of the region and the success of resulting clinics and workshops. Should you require further information of Mr. Henderson, or if you have any suggestions which could make his work easier, you can contact him by mail through P.O. Box #773, Thunder Bay "P", Ontario.

Suzuki Method

The Faculty of Education Auditorium was the site of a rare talent education demonstration on Monday evening, June 11. At that time, Mrs. Marian Moody and her five-year-old daughter Lisa, pictured below, explained and illustrated the Suzuki Method of early child training for the violin.

Mrs. Moody holds a Bachelor of Music Education degree from the University of Toronto, and has been involved in the talent education programme in Saskatoon for a number of years. She explained how this approach to early musical training grew out of the philosophy of the great Japanese violinist, Shinichi Suzuki, who wrote, shortly after the Second World War, that "All human beings are born with great potentials: each individual

has within himself the capacity for developing to a very high level. Education begins from the day of birth. We must recognize the amazing power of the infant to absorb everything in his surroundings and add to his knowledge. If attention is not given to early infancy, how can the child's original power be developed?"

Lisa and Mrs. Moody

The talent education programme based on this philosophy entails the joint training of parents and their three-or four-year-old children. While the mother, in private and group sessions, becomes familiar with the fundamentals of handling a standard violin, her son or daughter is given a bow and styrofoam replica of a violin with which to become familiar. After a few such sessions, the child is given a miniature violin ranging in size from 1/10 to 1/4 the volume of a standard instrument. From then on, mother and child learn together.

Suzuki's faith in the tremendous learning capacity of young children becomes apparent in a few short weeks when the child begins to learn faster than his parent.

Mrs. Moody leaves soon for demonstrations of the Suzuki Method in Europe.

On Library Services

The School of Library Technology hosted a Workshop on Library Services in Health Care Institutions, June 14, 15 and 16 which was sponsored by District Hospital Council No. 12, Ontario Hospital Association, Ontario Medical Association and the Registered Nurses' Association of Ontario. The Workshop co-ordinator was Mrs. M.A. Flower, Librarian, Ontario Medical Association, Toronto. Miss Verla Empey, Reference Librarian at the Toronto Academy of Medicine acted as Resource person in addition to a number of Library Specialists from the Thunder Bay area.

Mrs. June Leath Huntley, Health Sciences Resources Centre, National Science Library, delivered the opening address entitled "The Challenge of Library Service" at a dinner on Thurs-

day evening. A seminar on location and use of resources was conducted the next morning. On Friday afternoon registrants visited the Regional Nursing School Library and the Lakehead Psychiatric Hospital Library.

Challenge Met

The famed CKPR Redeyes, local fastball mentors *par excellence*, have accepted the upstart challenge of a University squad of dubious hopefuls known as Lakehead University Computer Center Campus Chaos Incorporated. Even though it is highly unlikely that such a sorry crew will successfully tarnish the Redeyes' reputation for swatting flies, it promises to be an entertaining event. The game (?) will commence at 8:00 p.m., Thursday, June 28 at Port Arthur Stadium. If you look like a kid, it will cost you a dime. The rest of us get in free for a quarter. The attendance of fastball fans with weak stomachs is discouraged. But, if you have a mildly sadistic disposition, you'll probably enjoy yourself.

Royal Visit

Tuesday, July 3, 1973 has been declared a civic holiday in Thunder Bay. The reason is what could be the event of a lifetime for the city, and for you. At 2:00 p.m., Queen Elizabeth II, accompanied by Prince Philip, will arrive at the Thunder Bay airport. She will be welcomed there by His Worship Mayor Assef, and many members of parliament, federal and provincial. Canadian Legion colour parties from all across Northwestern Ontario will salute the royal couple.

After a brief ceremony, the entourage will proceed down Highway 61 to Broadway Avenue and thence to the Point de Meurons site of historic Old Fort William. There, government officials will again make presentations to the Queen, with the primary gift being a souvenir study kit which is designed to commemorate the occasion.

This kit, which explains the significance of Old Fort William as the main working hinge of Canada in the fur trading days, will be available for distribution to school children in Ontario and the United Kingdom.

The Queen will then be treated to a brief pageant organized by the local branch of the Ministry of Natural Resources for Ontario. It will consist of the landing of two canoes, replicas of those used in the 1800's by the Northwest Company and the Hudson's Bay Company. Also, the Fort William Male Choir will welcome the voyageurs with traditional Canadian folk songs in French and English. The pageant will culminate in the symbolic presentation of a pack of fresh pelts in ex-

change for a typical pack of trade goods.

The entourage will then proceed to Taitt's House, the residence of the Superintendent of Old Fort William, from whence they will depart to the strains of "God Save the Queen".

Public entertainment, including choirs, bands, folk-dance groups, etc., will begin at 12:30 at the Old Fort William site. Since no vehicles will be allowed near the location, tourists and citizens are asked to watch and listen for news reports which will inform you of the location of parking lots from whence you will be taken by bus to this historic opening of Old Fort William.

Program Launched

The Ministry of Colleges and Universities has announced that funds have been made available for support of the Ontario Universities Program for Instructional Development. The program will operate under the direction of the Joint Subcommittee on Instructional Development of the Council of Ontario Universities and the Committee on University Affairs.

Up to \$150,000 will be available in the current year for support of projects approved under the program. Funds for the operation of an office to activate and administer the program have also been provided.

The Joint Subcommittee instituted a search in March for a director for the program and has now appointed Professor Harold M. Good to this position. Professor Good has recently been Associate Head of the Department of Biology at Queen's University. Formerly president of CAUT, and an officer of the Ontario Committee of Heads of Departments of Biological Sciences, he is the author or co-author of several reports on university teaching and related matters. The Director will be seconded from his normal university appointment for an initial period of two years.

The aim of the program is to assist individual faculty members in Ontario universities and the universities themselves in improving the effectiveness and efficiency of their instructional processes. No approach consistent with this aim whether concerned with the contribution of students, the organization of teacher time, the demands of research and administration, or the use of technical devices such as TV or computers is regarded as outside the scope of the program. The Director has expressed the hope that all members of the university community - students, staff, and administrators - will take an active interest in the program. Letters to the Director reporting activities which relate to instructional development, and suggesting priorities will be welcomed.

weekly events

Camp First

For the first time in Northwestern Ontario there will be a special summer camp for children with Learning Disabilities, Mrs. Janet Tothill, President of the Thunder Bay Chapter of the Ontario Association for Children With Learning Disabilities, announced recently.

This Association which helps children with Learning Disabilities is conducting a campaign to raise funds to finance the project through public subscription. The Camp will operate during the last two weeks of August.

In describing the activities that will take place Dr. J.H. Widdop, Programme Director, states that a major part of the programme will be taken up with specially designed exercises to improve co-ordination and eye-hand movements. Such exercises have been found helpful in the treatment of Learning Disabilities. Dr. Widdop, who is Director of Physical Education at Lakehead University, conducts a similar exercise class throughout the winter months.

Located at the Anglican Church Camp at Sandstone Lake, the camp will be able to accommodate fifty children, twenty-five during each week.

The child with a Learning Disability associates school with some very unpleasant experiences, resisting learning in a school situation. Mrs. Doreen Kronick of the Canadian Association says, "In the camp situation the child is more relaxed than in the school atmosphere, and a child who normally resists walking along the walking board will follow his cabinmates across a fallen log. A youngster who would neither print nor spell in school may proudly label the things he has found in the woods."

Pool News

Lakehead University completed a Royal Life Saving Society Programme with the following successful candidates: Elementary: - Mrs. Carol Hubelit, Mrs. Elaine MacLean, Tina Diasmirro, Roberta Savioli, Mrs. Eleanor Sparks, Susan Smulski, Marcel Danio, Joyce Hubelit; Intermediate: Mrs. Carol Hubelit, Linda Covello; Bronze Medallion: Iris Zebryk, Mrs. Faye Steadwell, Marianne Brownszuk, Lynn Webster, Gerald Hatherley, Ed Thurston, Frank Balent; Bronze Cross: - Gordon Mott; Award of Merit: - Carol Sinclair; Distinction Award: - Bob Haig, Rebekka Mueller, Scott Sellick; National Lifeguard: - Bob Thompson, Sue Harris, Janet Sillman; Red Cross Leaders: - Tracy Drynan and Celina Reitberger.

A complete life saving programme is available at the University Pool, as well as Spring Board Diving classes for all ages. Mr. Lou Adams teaches the diving. Two group learn-to-swim courses are beginning this month. The first course begins on Saturday, June 23, at 10:30 a.m. The second programme begins July 3 every morning. Registrations are being accepted at the pool of-

meetings

fice by mail, or telephone.

A Scuba Course will be beginning soon. Our Mom and Me Programme and Mother's Club programme are continuing throughout the summer months.

Men's Basketball

A summer men's open basketball league is being considered by the Athletic Department at Lakehead University. There will be a meeting Wednesday, June 20, at 8:00 p.m. in the classroom at the C.J. Sanders Fieldhouse. All persons interested in playing in a summer league should be present. Anyone unable to attend may indicate interest by phoning 345-2121, extension 650. All ages may indicate an interest.

Info Available

Faculty, students and members of the University community who are new to the Thunder Bay area are invited to come around to the Information Office which is located next door to the Switchboard in the Main Building. Brochures and pamphlets regarding local and district tourist attractions, camping facilities, and the like, have been collected for your convenience. You are welcome to this material, as well as to any information which might make your stay in Thunder Bay more comfortable and enjoyable.
