Lakehead University Convocation 2009

Lakehead University's forty-fifth convocation for the conferring of degrees and diplomas is being celebrated on Saturday, May 30, 2009, at our Thunder Bay campus and Saturday, June 6, 2009, at our Orillia campus.

The word "convocation" means "calling together." It is a ceremonial meeting of the entire University community. On Convocation Day, University members and their guests wear special attire based on a tradition that dates back as long as seven centuries ago. The academic costume, also referred to as academic "dress" or "regalia," had its origins in the ancient European universities. The regalia was devised to distinguish academic persons such as doctors, licentiates, masters, and bachelors. In the middle ages they were worn as everyday attire. Gowns were a necessity because of unheated buildings, and hoods were needed to cover the heads of medieval scholars.

There are many variations of academic dress. The hood, gown, and in some cases the special hat (mortarboard) worn by an individual are determined by the style of the university where he or she received a degree. The colourful gowns and hoods of universities from across Canada, the United States, the United Kingdom, and several other nations of the world are worn at Lakehead University today.

The academic dress chosen by Lakehead University is fashioned after that of the University of Oxford, the oldest English-speaking university in the world. The robes worn by the officers of the University – the Chancellor, who presides at convocation, the President (who is also the Vice-Chancellor) and the Chair of the Board of Governors – are all of the Oxford cut and trim. Each has its own distinctive colour. The colourful gowns worn by the individuals who are receiving honorary degrees are of the same design as are the black gowns worn by the student candidates. The ritual at convocation reflects the medieval custom that anyone in a university could wear a gown, but a hood was the symbol of a degree. Students who have met the University's academic requirements (three, four, five, six or seven years of study in particular subjects) wear the symbol of their status as holders of a Lakehead University degree. Lakehead University's bachelor's and master's degree hoods are distinguished by a one or two inch colour

border which indicates the degree acquired, e.g. white for Arts, blue for Education, green for Forestry, burgundy for Nursing, etc. Lakehead's first PhD degree was conferred in 1998.

In addition to "earned" degrees, the University confers "honorary" degrees which symbolize the highest honour that can be conferred on an individual by the University. An honorary degree may be awarded in recognition of scholarly or creative achievements or distinguished public service to the country or region. They go to individuals who have been designated by the University's Senate, its senior academic governing body, as deserving special honour. At convocation the degree is awarded *honoris causa*, or "for the sake of honour." A hood is also given to the recipient and it may be worn to any academic affair. Recipients of these degrees become honorary alumni of the University and they may affix, after their names, the abbreviation of the degree. The Doctor of Science will be conferred on two candidates this year at the Thunder Bay Campus and the Doctor of Letters will be conferred at the Orillia Campus.

The Board of Governors of the University also recognizes individuals who have contributed to the growth, development, welfare, and well-being of Northwestern Ontario and of Lakehead University. This is done by the conferring of the title Fellow of the University. You will recognize University Fellows by their familiar blue gown with white velvet epitoge or scarf.

During the processional and the recession the Marshal for convocation carries the Mace, a silver wand which is a traditional symbol of the University's authority. This mace was given to the University by the Alumni Association in 1971. It bears the university's motto *Ad augusta per angusta*, Achievement through Effort.

As Lakehead University celebrates its forty-fifth convocation with students, parents, friends, and community, it is worthwhile to remember that convocation participants dress in clothes which are symbolic, not functional. They go through a centuries-old ritual for the conferment of degrees and diplomas – a milestone in the lives of our graduates. We thank you for being present to share this special event with us.

Photographs – Those wishing to take pictures of the graduates are most welcome to come forward to the left and right of the stage. To avoid congestion of the areas, please wait until your particular graduate is ready to cross the stage before you come forward.

FORTY-FIFTH ANNUAL
CONVOCATION
FOR THE CONFERRING
OF DEGREES AND DIPLOMAS

John Evans

Medical, academic, research, and business leader

Dr. John Evans is one of Canada's foremost innovators and a long-time leader in the medical, academic, research, and business communities.

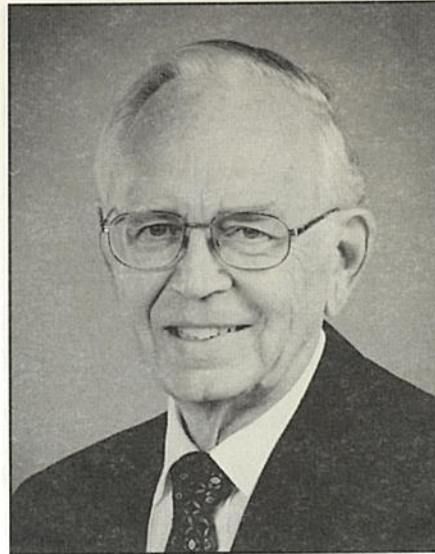

After graduating from the University of Toronto as an MD, he was awarded a Rhodes Scholarship to study at Oxford, where he earned his DPhil. On his return to North America, he completed residencies in Internal Medicine and Cardiology and qualified as a Fellow of the Royal College of Physicians and Surgeons of Canada. He was elected a Fellow of the Royal College of Physicians (London) and a Master of the American College of Physicians in the United States.

Dr. Evans was an Associate Professor in medicine at the University of Toronto from 1961 until 1965, when at age 35 he was recruited as Founding Dean of a new medical school in Hamilton. Under his leadership, the School of Medicine at McMaster University opened in 1970, introducing students to a revolutionary system of problem-based learning, where they immediately became involved in patient care. Since that time, problem-based learning has become the preferred method of instruction in many medical schools around the world, including the Northern Ontario School of Medicine.

In 1972 Dr. Evans returned to the University of Toronto and served as its President until 1978. He was appointed to the Pépin-Robarts Commission on National Unity, whose 1979 report made radical proposals for national unity. The Rockefeller Foundation hired Dr. Evans in 1979 to undertake a study of public health and population-based medicine around the world. His report led to a job with the World Bank as founding director of its Population, Health and Nutrition Department, where he focused on reducing infant mortality in less developed countries.

John was appointed to the board of The Rockefeller Foundation in 1982 and served as its Chair from 1987 to 1995. In 1983, he became the founding Chair of Allelix Biopharmaceuticals Inc., one of Canada's first biotechnical companies. He joined the board of the media company Torstar in 1984 and served as Chair from 1993 until 2005. He also served as Director and Chair of the Board of Alcan Aluminium Ltd from 1986 until 2002. John was the Founding Chair of the Canada Foundation for Innovation in 1997 until 2006. In 2005, John also became Founding Chair of the Ontario Institute for Cancer Research and remains a member of its board of directors. Currently, Dr. Evans is the Founding Chair of the MaRS Discovery District in Toronto, an innovation centre where scientific research connects with business.

Dr. John Evans is a Companion of the Order of Canada, a member of the Order of Ontario, a Fellow of the Royal Society of Canada, and a laureate of the Canadian Medical Hall of Fame and the Business Hall of Fame. He was awarded the 2002 F.N.G. Starr Award, the highest honor of the Canadian Medical Association, and the 2007 Henry G. Friesen International Prize in Health Research for his longstanding contributions to medical sciences.

John Ross Augustine

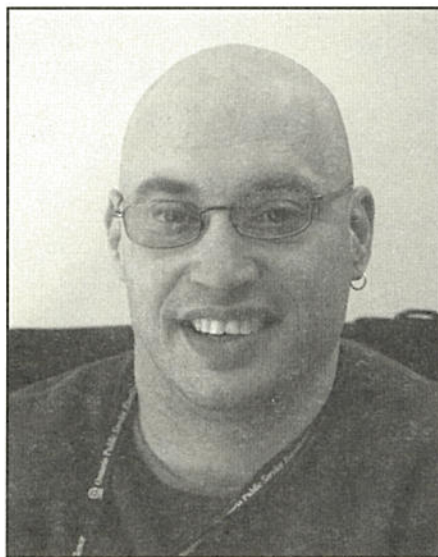

Physician, mentor, community leader

Dr. John Augustine grew up in Kitchener, Ontario, and received his MD, with Honours, from the University of Western Ontario in 1952. He moved to Thunder Bay in 1954 to set up a successful practice as a family physician at the Spence Clinic. In 1956 he returned to Toronto for three more years of training and in 1959 became a Certified Specialist in Internal Medicine. Dr. Augustine worked as a highly respected specialist in this field until his retirement from clinical practice in 1994.

John's abiding interest in health care led him to take on the roles of educator and activist. In his long involvement with the Royal College of Physicians and Surgeons of Canada (RCPSC) he has been an oral examiner testing post-graduate Internal Medicine students from universities across Canada, and took part in the RCPSC's Accreditation Committee which certifies post-graduate medical and surgical programs at Canadian medical schools. He also served four years on the Executive of the RCPSC, including a term as Vice-President (Medicine). He received a Certificate of Appreciation from McMaster University Faculty of Health Sciences for his early and continued significant role in the formation of the Northern Ontario Medical Program (NOMP) and in 2000 became a Senior Member of the Canadian Medical Association.

Putting his keen intellect to use, Dr. Augustine became involved in several landmark undertakings that have changed the face of health care education and delivery in Northwestern Ontario. He was President of McKellar's Medical Staff from 1968 to 1970 and was the Founding Chair of the Cardiac Stress, Palliative Care, and Ethics Committees at McKellar, and later participated in the Fund Raising Committee for the construction of the Thunder Bay Regional Health Sciences Centre. John was also a founding member of the Thunder Bay branch of the Addiction Research Foundation of Ontario and worked extensively in the area of addictions treatment and prevention; he set up the first methadone treatment outreach for addicts in the late 1980s.

In 1971, Dr. Augustine, along with many others locally and the new Dean of Medicine at McMaster University, Dr. John Evans, developed the Northwestern Ontario Medical Program (NOMP) and served as its Founding Chairman. The NOMP initiative brought medical students from McMaster Medical School to Northwestern Ontario to work with local doctors and health care providers. John took on multiple positions within NOMP including coordinating Internal Medicine placements, acting as a Clinical Preceptor, and serving on the Admission Interview Team. John's work with NOMP from 1969 to 2000 was a natural springboard to his role in the creation of the Northern Ontario School of Medicine (NOSM). Concerned with the shortage of family doctors and the growing crisis this was causing, he was convinced that Northwestern Ontario needed its own medical school to sustain a viable health care system. John rallied the medical community in support of the idea of a northern medical school and in 1999 was appointed Chair of Lakehead's President's Committee to establish a school with campuses in Thunder Bay and Sudbury. Throughout this process as a Community Representative of the Liaison Committee and NOSM Board Member, he never wavered in his vision. John is married to Annette Augustine who was named a Fellow of Lakehead University in 1995.

Terry Robinson

Athlete, community leader, human resources professional

Terry Robinson has always had big dreams and the perseverance to realize them. He was born with cerebral palsy but growing up he was able to participate fully in school and recreational activities because of his determination and the support services provided by his hometown of Dryden, Ontario. A natural leader who approached everything he did with enthusiasm, Terry's childhood passion for sports spurred him to become a Canadian Paralympian.

Terry competed in the electric wheelchair slalom, boccia, and other field events at championships around the world and he won track and field bronze medals in the 1988 and 1992 Paralympics. After retiring as an athlete in 1992, Terry served as an International Boccia Referee and an Assistant Coach for the Canadian National Boccia Team. His athletic accomplishments were recognized in 2008 when he was inducted into the Northwestern Ontario Sports Hall of Fame.

Retirement gave Terry time to focus on academic studies at Lakehead University. His sports background and his personal experience with vocational rehabilitation services sparked an interest in kinesiology, and he graduated from Lakehead University in 1997 with an Honours Kinesiology degree. Terry later completed a Human Resources Management Post-Degree/Diploma Certificate program at Confederation College and since 2004 he has been with the Ministry of Government Services where he works as an Assistant Human Resources Consultant.

Terry Robinson's mission "to lead, educate, and motivate others" has caused him to take on many advocacy and public service roles. As LUSU President in 1994-95, Terry represented Lakehead University students' issues and concerns with all levels of government. Since graduation, he has given motivational talks, worked as a Direct Funding Program Co-ordinator and Independent Living Skills & Career Development Facilitator with the Independent Living Resources Centre Thunder Bay, and volunteered as the District Council Chair of Public Education for the Easter Seals Society. Most recently, he completed Terry's Trek in the summer of 2008 in tandem with Jonathan Howard's Run the Dream, to raise awareness and funds for autism spectrum disorders.

From 1998 to 2005 Terry served as a committee member and board member of the Alumni Association of Lakehead University. Of his time at Lakehead Terry says that, "I greatly appreciate and thank Lakehead for helping me grow, in and out of the classroom, and making me the person that I am." Terry Robinson's optimism, selflessness, and dedication to improving the lives of others have made him a role model and a force to be reckoned with. We look forward to watching the unfolding of his accomplishments in the years to come.

Richard Stallman

Free software advocate

Richard Stallman is internationally recognised as a leader in the free software movement, which argues that everyone should be free to run, share, study, and modify software. To understand the concept of free software, Richard says, "You should think of free as in free speech, not as in free beer."

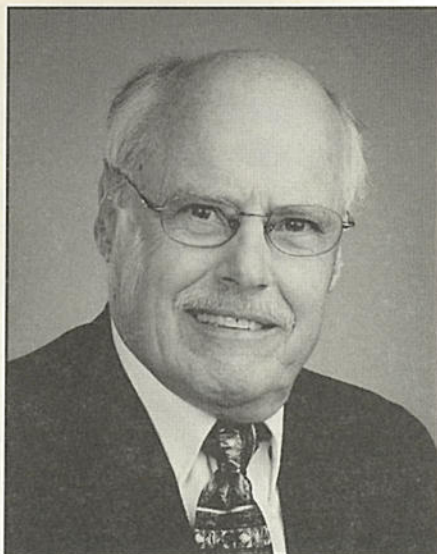

Born in New York City in 1953, Richard Stallman graduated from Harvard with a BA in Physics in 1974 (one year before Bill Gates dropped out of Harvard to create Microsoft). While studying at Harvard, Richard also worked as a staff hacker at the Massachusetts Institute of Technology's Artificial Intelligence Lab, where he learned how to develop operating systems. After graduating, he continued working at MIT until 1984, when he left to start the GNU (pronounced guh-NEW) Project.

The GNU operating system is a complete, free software system, upward-compatible with Unix. GNU stands for "GNU's Not Unix." Richard developed a number of widely used components of the GNU system, including GNU Emacs (an extensible, customizable text editor), the GNU Compiler Collection, and the GNU symbolic debugger (gdb). The GNU operating system, in combination with the kernel Linux, is used in millions of computers worldwide.

To keep GNU software free, Richard pioneered the concept of a copyleft agreement, which flips copyright on its head by saying that anyone who redistributes the software, with or without changes, must pass along to all subsequent users the freedom to further copy and change it. Richard is the main author of the GNU General Public License, the most widely used free software license in the world. In 1985 he started the Free Software Foundation (FSF), a charity that promotes and defends the rights of free software users around the world and provides a legal infrastructure for the free software movement.

Since the mid-1990s, Richard has spent most of his time zealously advocating for free software around the world. He campaigns against software patents and what he sees as excessive extensions of copyright laws. In 1989 he co-founded the League for Programming Freedom, whose aim is to prevent monopolies in software development.

Among other honors, Richard has been granted honorary doctorates by Sweden's Royal Institute of Technology, the University of Glasgow, the Vrije Universiteit Brussel (Brussels Free University), the Universidad Nacional de Salta (Argentina), the Università Degli Studi di Pavia (University of Pavia, Italy), and the Universidad Los Angeles de Chimbote (Peru). He believes that using free software is a political and ethical decision that affirms the right to learn and to share one's knowledge with others. By making free, high-quality software available as an alternative to proprietary software, he has benefited everyone who uses a computer.

John Howard Mervyn Whitfield

Professor, administrator, community leader

Dr. John Whitfield's love of northern Ontario is deep rooted. Born in his grandparents' farmhouse in the township of Thessalon, Ontario, he grew up with a passion for nature and the outdoors. Although John had planned to study engineering, his fascination with the complexities of mathematics exerted a stronger pull. After receiving a Bachelor of Arts from Abilene Christian University in 1961, John completed a Master of Arts at Texas Christian University in 1962 followed by a Doctor of Philosophy from the Case Institute of Technology in 1966. In 1965, he joined Lakehead University as an Assistant Professor of Mathematics, beginning a 36-year association that has left an indelible mark on Lakehead.

Dr. John Whitfield has written a multitude of articles and reviews that have appeared in scholarly publications. He has also presented his work at national and international conferences and received Natural Sciences and Engineering Research Council of Canada operating grants for 25 years. John became an Associate Professor in 1970, achieved a full professorship in 1982, and is now a Professor Emeritus of Mathematics.

In 1986 John became the Dean of the Faculty of Arts and Science followed by the position of Vice-President (Academic), a job he held from 1990 to 1997. As an early board member of the Northwestern Ontario Technology Centre, Dr. Whitfield was at the forefront of the effort to incubate and attract biotechnology businesses to Northwestern Ontario. He also helped the University through a period of transition by acting as the Interim President in 1997-1998 and finished his impressive career at Lakehead as the Vice-President of Research and Development from 1998 until his retirement in 2001.

His determination to make both Lakehead University and the community stronger is clear from John's visionary work improving the infrastructure of Northwestern Ontario's health care system. In the mid-1990s he helped facilitate the amalgamation of the McKellar and Port Arthur General Hospitals and their Foundations. As a board member of Lakehead's Northwestern Ontario Medical Program from 1993 to 2001, he was part of an initiative that brought graduate medical students from McMaster University to train at health care sites in our region.

John's advancement of regional health care included the critical role he played in the genesis of the Northern Ontario School of Medicine (NOSM). He was a Co-Chair of the Lakehead-Laurentian Universities Committee to establish the medical school and since 2003 he has been on NOSM's board. He advocated for a medical school that would be pan-northern in nature and draw upon clinical teachers throughout the region to meet Northwestern Ontario's unique health care needs. From 2005 to 2008 he served as Founding Chair of the North West Local Health Integration Network, a position he held until his retirement in 2008.

Dr. John Whitfield is devoted to his wife Diane and their four children (Karen, Megan, Brian, and Evan), and has been a dedicated volunteer with numerous community groups including the Thunder Bay Art Gallery and the Thunder Bay Community Foundation.

Poh Lam Tan

Business leader

Poh Lam Tan doesn't let himself be constrained by limits – a very useful talent in the marketing field. His ability to see potential in overlooked areas has brought success to his business ventures and transformed him into a major force in the Asian entertainment industry.

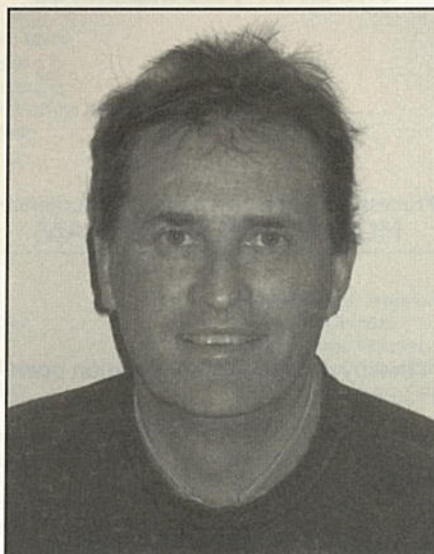

Poh Lam's adaptability and diverse interests became evident early in his life. He was on Singapore's national badminton team and completed his national service in the Singapore Navy. After his stint in the Navy, Poh Lam traveled across the world to attend university at Lakehead because he "wanted to do something different and had heard many wonderful things about Canada." Although unfamiliar with Canadian culture, Poh Lam threw himself into academic and social life with enthusiasm. He graduated with a Bachelor of Administration in 1980 and returned to Singapore to begin his career.

Poh Lam's first major job was as Brand Manager for Coca-Cola and 7-Up with the food and beverage company, Fraser & Neave. In 1982, he joined Liebermann Overseas as the Group Product Manager and put his knack for promotion to use marketing European luxury goods. By 1987, however, Poh Lam was looking for a new challenge. He began working for Warner Home Video, the video distribution arm of American entertainment giant Time-Warner. Poh Lam quickly worked his way up the corporate ladder, managing ever larger areas of Asia and the Middle East as the Vice-President, Asia.

His experiences in the entertainment industry made Poh Lam believe that Singapore's home video market wasn't being fully tapped into, so he left the security of Warner Home Video and formed his own company, Alliance Entertainment Asia (AEA) in 2000. AEA distributes videos for companies such as Warner Bros, MGM, and 20th Century Fox and it also operates a chain of Video Ezy movie sale and rental outlets. Poh Lam acquired the franchise rights for Video Ezy, an Australian-based company, in 2001. His gamble paid off and AEA now brings in approximately \$12 million US annually.

Not content to rest on his laurels, Poh Lam embarked on a different direction in 2007 when he acquired the Singapore and Thailand licensing rights for various Learning and Motivation Programs for students from Quantum Learning Network USA. QLN conducts SuperCamp, which provides innovative educational programs for children to build life skills and foster academic development. This coincides with Poh Lam's growing interest in focusing on health and happiness and his wish that his son and daughter "become good and socially responsible people and appreciate that money and material things are not everything."

Poh Lam says his sojourn at Lakehead "significantly contributed to my confidence and ability to socialize and interact with all kinds of people." It is Poh Lam Tan's combination of an entrepreneurial spirit with a deep commitment to treating people with fairness that has made him such a respected figure in the business world.

Thomas Ryan

Professor, teacher, and author

Dr. Thomas Ryan grew up in Georgetown, Ontario, but his attraction to sports and hockey brought him to the Northwest in 1981 where he enrolled in Lakehead's Physical Education program and played for the Lakehead University Nor-Westerns hockey team. Thom quickly immersed himself in campus life working as the LUSU Sound Manager deejaying at events and serving as the President of Atikokan House residence. This capacity to do many different things well has made Thom into a leading educational theorist. Fortuitously, Lakehead was also the place where Thom met his wife, Leslie, who was studying social work.

After graduating in 1985 with an Honours Bachelor of Physical Education and a Bachelor of Education, Thom taught briefly in Thunder Bay area high schools before moving to the Kingfisher Lake Reserve to teach academic upgrading through Confederation College. This experience prompted him to obtain a Master of Education in Indian and Northern Education at the University of Saskatchewan in 1988. From 1987 to 2000, Thom worked as a substitute teacher, special educator, and physical educator at elementary and secondary schools throughout southern Ontario. He also successfully pursued a Doctorate of Education at the University of Toronto's Ontario Institute for Studies in Education (2001).

Thom was hired as an Assistant Professor at the University of Lethbridge's Faculty of Education in 2000. During this period he also began working as an online professor with Campus Alberta Applied Psychology. In 2002, Thom felt the urge to return to Ontario and he accepted a position at the University of Nipissing in North Bay where he is now an Associate Professor in the physical and health education program.

Thom's nomadic lifestyle and sense of spontaneity is matched by the breadth of his research interests. His desire to instill teaching excellence and facilitate professional development led him to publish three books: *The Reflexive Classroom Manager*, *The Reflexive Physical Educator*, and *The Reflexive Special Educator*. These handbooks provide a peek inside different aspects of teaching, and *The Reflexive Classroom Manager*, now in its second edition, has been published all over the world. Thom has also contributed chapters to books such as *Passing the Test: A Book of Readings on Provincial, National, and International Testing in Canadian Public Schools* and is lead author of *Canadian Educational Leadership*. He has an impressive list of articles that have appeared in national and international journals such as the *New Zealand Journal of Teachers' Work*.

Thom's intellectual curiosity is often piqued by his students' research topics. He has delved into many key issues in contemporary education and is currently examining the phenomenon of cyberbullying. Thom plans to explore ethics education in his next book which will focus on ethics, values, and decision-making, or as he puts it, "doing the right thing." Dr. Thomas Ryan has become an important voice in the field of educational philosophy and practice and he credits Lakehead University for providing an essential part of the foundation of his career development. In his words, "Lakehead gave me a lot of good food for my mind."

Gwynne Dyer

Journalist and filmmaker

Gwynne Dyer is one of the world's leading geopolitical analysts and a prolific journalist, broadcaster, filmmaker, author, and lecturer. His twice-weekly column on international affairs appears in 175 newspapers in 45 countries, including *The Chronicle-Journal* in Thunder Bay.

Born in St. John's, Newfoundland and Labrador, Gwynne joined the Royal Canadian Naval Reserve in 1959 at the age of 16. He was educated as an historian, graduating with a BA in History from Memorial University (1963), an MA in Military History from Rice University in Texas (1966), and a PhD in Military and Middle Eastern History from King's College London at the University of London (1973). As a military analyst, Gwynne has the unique qualification of having served in the naval reserves of three countries: the Canadian Naval Reserve (1959-1964 and 1966-1968), the United States Navy Reserve (1964-1966), and the British Royal Naval Reserve (1968-1973). He began his career as an academic, lecturing on War Studies at the Royal Military Academy Sandhurst from 1973 to 1977. During this time he began writing articles about the Arab-Israeli conflict for newspapers in London and eventually turned to journalism full time.

Gwynne produced a seven-part radio series, *Seven Faces of Communism*, for the CBC and ABC in 1978. This quickly led to another radio series, *War* (1981), which was based on his own military experience and extensive study. *War* later became a book and a seven-part film series (1983), which was broadcast in 45 countries. One episode, "The Profession of Arms," was nominated for an Academy Award. Two of Gwynne's television series have won Gemini awards: *The Human Race* (1994), about the roots, nature, and future of politics; and *Protection Force* (1995), about peacekeepers in Bosnia.

Other radio documentary series include *The Gorbachev Revolution* (1990), based on Gwynne's experiences in Eastern Europe and the former Soviet Union; and *Millennium* (1996), about the emerging global culture.

An updated edition of his book *War* was published in 2004. Two other recent titles deal with the politics and strategy of the post-9/11 world: *Ignorant Armies* (2003), *Future: Tense* (2004) and *The Mess They Made: The Middle East After Iraq* (2006). Another book, *Fighting Decline*, is set for release in 2010. Gwynne's latest release is *Climate Wars*, a book and a radio series that look at the possible geopolitical consequences of climate change, including international competition for resources, political unrest, and economic collapse. The three-part radio series was broadcast on the CBC program *Ideas* early in 2009.

Gwynne Dyer was the recipient of a 1984 International Film Festival Award and the 1986 Best Writing Gemini for his film *The Space Between*. He has been awarded honorary degrees by Memorial University, Royal Roads University, and the University of Guelph.
