YOUR UNIVERSITY

**Serving
Northwestern
Ontario
since 1965 . . .**

Offers comprehensive programs in Arts, Business, Education, Engineering, Forestry, Library Technology, Nursing, Outdoor Recreation, Physical Education, Science and Social Science.

Provides instruction on-campus and off, part-time and full-time, fall, winter and summer.

Has athletic and recreational facilities including an olympic swimming pool, squash courts, gymnasias, tennis courts, comprehensive varsity and intramural sports programs.

Has an active continuing education program for professional development and for special groups.

Keep in touch with us through

Meet the Director

TRANSITIONS --

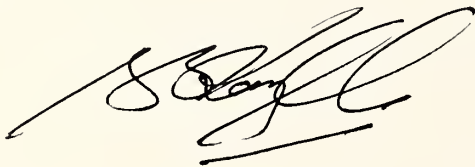

The first graduating class of 1973 is having its tenth anniversary reunion in 1983, and by the quirk of our numbering system, the eleventh class will be graduating. Thus, 1983 is both the end of the first ten and the beginning of the next ten years, and I feel particularly honoured to have been able to join the group.

Graduates, students, and staff have achieved much in this time, and as the School continues to develop its three programs, curricula and administration are going to be changing to reflect current and forecasted needs. Thus it is planned to have full faculty status in the near future, and to have program chairman responsible for the technical, degree, and post-graduate programs. Knowing exactly what is going to be needed in the future is, needless to say, not possible, but the faculty believes we will be able to maintain the excellence of our programs, and contribute to the excellence of our graduate in spite of the severe financial constraints currently being experienced by all Universities.

I mentioned "... contributing to the excellence of our graduates ..." because we only contribute. The intrinsic qualities of you as students, and graduates, including your motivation, academic prowess, sense of identity, and yes, esprit de corps, all constitute the major contributions to your excellence. One recent example was the awarding by the Society of American Foresters of the Award of Merit for "Harvest 1981". Your publication ranked 4 in 16 for North America, and I believe all students have a right to be justly proud, especially when the School of Forestry yearbook is the only one at Lakehead.

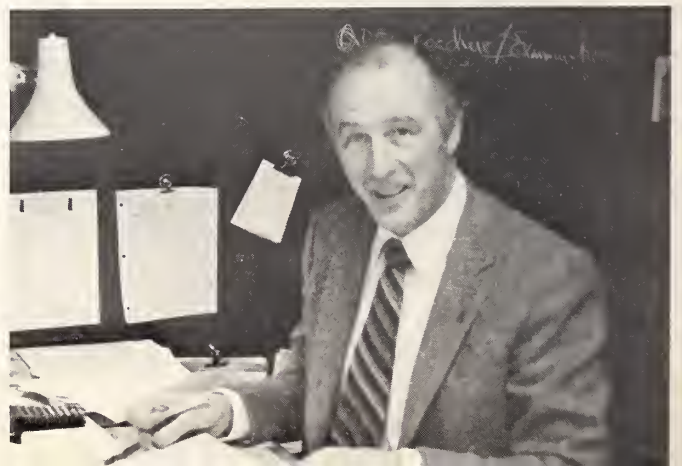

For the future, the usual foggy crystal ball is, with current economic uncertainties, virtually opaque. I nonetheless still feel that technically competent, ecologically and economically sensitive, and socially aware foresters will remain in high demand. Now that some of the 1973 graduates have gained valuable experience, they are becoming actively involved in our teaching programs. I trust that those of you graduating in 1983 won't feel obliged to wait 10 years to make your inputs because we need them on a continuing basis in order to maintain our quality and viability. I hope you agree, and that you will always feel welcome.

Following in the tradition of For. Deg. I classes, we have retained the true spirit of full-fledged apathy. For example, we have not as yet acquired a class name, although certain ideas, such as "The Psycads" have been proposed. Perhaps in the near future (at least before 1986!) we'll find some word to describe us!

All in all, we had a great time getting to know each other, in class and after class (especially through recreational cruising!). Next year we might even shock ourselves and get involved in some activities! No matter what, I'm sure we'll have as good a time as we did this year.

Hey Dave! Try this one!

dwi

Pick a tree, any tree.

I try not to let school interfere with my social life!

dwi

Field School

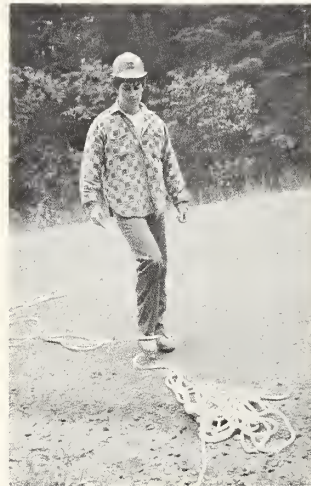

Field School proved to be a great time for one and all. We even found time to learn something. Tech I found 101 ways to learn the same thing told by different pros. Deg I went 'leafing' through the bush with garbage bag in hand, and came close to leaving the country in their quest for Dendro. Some Tech II's decided to get their feet and everything else wet by spending a rainy night in Raith. Degree II learned a valuable lesson in handling a chainsaw (Right Juha??!) and how not to pinch a fire hose (Right Rob?) Life was the pits for Degree III, soil, soil, and more soil!! Degree IV had a great party going (What No Booze?) at Rinker Lake. What are we foresters turning into? Well, back to classes.

Good Luck!!!

Professional Treeplanters in the making.

Tech I

The first year has been a good one for the Tech I class. We started out with the camaraderie of field school when everyone was wondering what the h--l was going on thru closed eyelids and yawns. Then on to the Crest and later the dreaded 'Baptism' and MUCH later to classes. The favourite class, no doubt was soils mit Prof. Zingel and Geology with uh Prof. uh Kissin running second.

Tech I did well in sports thanks to the organization and encurring spirit of a dedicated few. All in all a very good year for Tech I.

The calendar never mentioned that the shit pits is a prerequisite to becoming a forester, but at LU, it is the unwritten law. This year it was actually sunny, so the newcomers had it easy. September 25 was the chosen day. Rowdy, enthusiastic first year techers and degreeers flocked to the pits, which were hosted by the Coureurs de Bois and Tekers dontus karus classes. The annual Miss DBH (sorry guys, only females are allowed to compete) and Mr. Butt contests were held. Cheryl (Leather) was crowned Miss DBH and only Mr. Butt knows for sure who he is. Then one and all passed through the "water hazard" to reach the warm fire across the mighty Mac and down a beer. Welcome to the club!

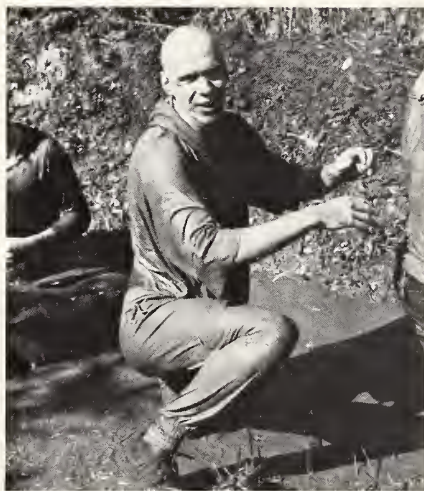

Take it all off!

smg

I quit!

Diploma in Forest Technology

Tech II

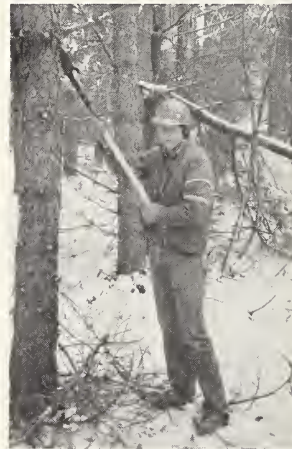

Finally, our graduating year has arrived (and for a select few, it's a bit overdue). This year we saw our Techers win the Forestry Baseball Tourney, play their hearts out in broomball, skate circles around the opposition in hockey, a spirited effort by our curling team (way to go Joan, Jeff, Arlene, Andy and Dave) and a valiant attempt by those that participated in the Engineer's bus pull. How about our memorable Harvesting field trip, and is Gonzo still in the photo lab? I think it's safe to say we are all glad to get that out of the way. To bring the year to a close, I'm certain our grad will be a success.

THE CHALLENGE OF FOREST MANAGEMENT

The great forests of Ontario are renewable—but forest regeneration still requires careful research and planning.

On one front, the Ministry of Natural Resources has been experimenting with growing poplar from tissue culture in test tubes. If successful, the program will allow the Ministry to produce thousands of genetically superior plantlets for its regeneration program.

This is but one aspect of forest management. We are proud to participate in many ways in teaching proper forestry practices to tomorrow's foresters and technicians.

Ministry of
Natural
Resources

Minister
W. T. Foster
Deputy Minister

Coueurs de Bois

Degree II tried their hardest to live down their image of 'Keeners' placed on them by Les Bucherons. Many could be found at the 'Study' on Friday afts to basically get Stats out of their systems. Somewhere between Moose and Goose, Photo, English, and Computer, time was found to welcome the new tech transfers from Newfoundland to British Columbia. Some of the transfers did not know where they belonged. Time was also found to participact in many intramural sports. Thanks to all who came out, and watch out for next year coz we're up and coming.

Dad, can I borrow the car?

Who's on First???

It was the nippy October morning after the Corn Roast when the Forestry teams slugged onto the field. The day was overcast, and although hung over, a spark of indomitable forester spirit was on the fields. The games were an array of baseball expertise outfielding incompetence, and beer. In the end, it was the Tech II all-stars up against the best of the Coureurs de Bois. The result was the Degree II team going down to a rather crushing defeat, after a day of Calsbergs.

Congratulations Tech II for a fine performance.

Kam-Am Canoe Race

The sky was cloudy and so were a few minds that morning but somehow we all got pointed in the right direction and the race was off. As always there were those few confused souls who actually decided to race and they were soon out of sight despite our best efforts to talk them out of it.

One team, sensing their inevitable defeat, hailed the first passing cabin cruiser and spent the rest of the trip eating granola bars and drinking. The one casualty of the race (D&R racing team) learned the difficulty of 'watering the grass' from mid-stream but luckily were pulled from the chilly waters of the McKellar.

When the waters finally stilled and the paddles laid to rest we found the Outdoor Rec's had finished first and second again. Ken and Dick Morden lead with a time of 1 hr. 49 min., followed by Bernie Brault and Angie Walton at 2 hr. 11 min. Coming in a close third to uphold the foresters honour were Peter Harpe and Peter Green (better take the portage next year guys!). Congratulations to all the other teams for making the day a great success.

BACK ROW: Christopher Wilson, Bill De Groot, Bill Van Schip, Keith Fletcher, Mario Lapierre, Keith Ley, Anna Szabo, Rick (Ski) Ksiezopolski, Reg (Class Rep) Hiebert, Gaspar Horvath, Ralph Jacob, Erin (The Green) Leffers, Richard (Zee) Zotz, Mike (Rabbit) Robichaud, Don Vaillancourt, Jim (Ripper) Neill, Greg Rawling.

dob

Les Bucheron!

A special breed of forester that somewhat resembles their symbol if not in body, at least in spirit. This means that they are all as ferocious as the Hulk and they all spread terror throughout LU not with a double-bladed axe, but with a hockey stick, or soccer shoes, or just with brilliant mental skills.

Engineer: "Oh ya, and just where have these brilliant mental skills gotten you?"

Les Bucheron: "Well, for starters, our soccer team has been invited to participate in the next world cup."

Artsie: "Wow!"

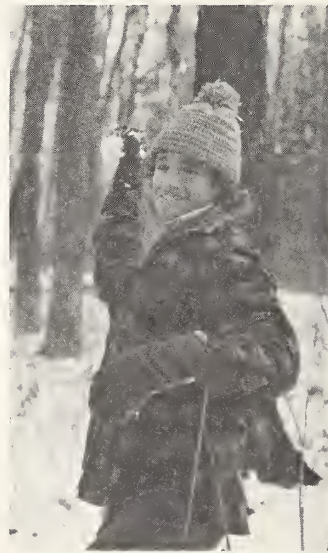

Les Bucheron: "Herald Balard wants to purchase our hockey teams."

Outdoor Recker: "Ohhh!"

Les Bucheron: "And to be able to play on our water polo team you, like a frog, must have webbed feet and ribbit."

Lorax: "Now that's brilliant."

And our skills don't stop there. We also excel academically. In fact, I heard through the grapevine that Great Lakes will be opening up 40 vice-presidential positions just so some of next year's graduates can have a deserving job. But first we'll all have to make it out of Hazenburgh's business or is it economics - I'm still confused.

Scot's Pine and Tulips

We arrived on Dutch soil early in May, ready to take a crash course in Dutch forestry. After a crash course in the Dutch train system, we arrived in Arnhem where we were immediately made welcome by 14 Dutch students. After taking a short chainsaw course, we left our mark on the Dutch landscape. It was quite an experience. At the end of the summer, we were really sorry to say goodbye to all the wooden shoes, windmills, and blond, blue-eyed males. Thanks to all who helped make the exchange possible. All photos by Leslie Hawkins.

Shopping Kart Race

Eight teams entered this year's race, held on October 20, 1982, and a total of 7 teams finished. The race began and ended on the pottery road and was a relay-style race. Highlights of the race: at the first bump, almost all carts were involved in a pileup (luckily most riders wore helmets); the ramp in front of the library proved to be too narrow for one extremely long cart.

The winner of the best decorated cart was the Hell's Angel team with their souped up cart. For an unprecedented 3rd year in a row, first place was snatched by the fleet-footed Colt 45's. Maybe the consumption of pre-race fuel helped them win. Anal Pores picked up second place and Team Rossi came in third.

Next year's race should be a thriller with the OLD Colt 45 team attempting to hold off the YOUNG Anal Pores.

Pre-race preparation.

GRADUATE STUDIES

The graduate program in Forestry at Lakehead is growing. The first enrollment was in '77 and since then about 10 students have graduated. In '82, there were 13 enrolled in the fields of: Silviculture, Fish and Wildlife, Genetics, Biometrics and Harvesting, with almost half beginning their first year. Most have their B.Sc.F., but allied disciplines such as Biology and Forest Engineering are also applicable.

The program emphasizes research in methods of renewing and improving forest resources and maintaining the forest environment.

The head of Lakehead's Senate Graduate Studies Committee is Stan Walker, and Chairman of the Graduate Studies Committee is Ken Brown.

F. Bennett, M. Harvey, C. Sutherland.

smg

GENETICS

Frances Bennett, 3rd yr. (Dr. Parker)

Frances is studying genetic variation among three N.A. west coast species whose ranges overlap. (A. procera, the intermediate variety: A. MAGNIFICAVAR, SHASTENSIS, and A. MAGNIFICA.) Gene exchange patterns between or within these species are explored using flavonoids, a species-specific chemical characteristic of needles.

Tom Krickl, 3rd yr. (Dr. P. Knowles)

Tom is comparing the genetic variability of PICEA MARIANA from improved source (of the Ontario Tree Improvement Program) and natural stock. Since disease resistance is closely related to genetic variation, improved stock most similar to natural in this respect will be more desirable.

Gwen O'Reilly, 2nd yr. (Dr. Parker)

Geographic variability of PICEA MARIANA across Northern Ontario, and lowland/upland ecotype difference is Gwen's thesis topic. Morphological characteristics of the cones and needles are the criteria for her study; also, proteins in the foliage and seeds, called isozymes are useful.

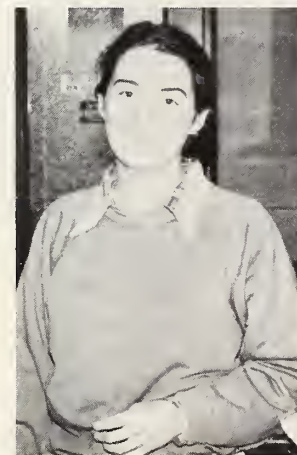

Laird Van Damme, 1st yr. (Dr. Parker)

In a continuation of his undergraduate thesis, Laird is assessing the efficiency of alternate plus - tree selection methods for PICEA MARIANA.

SILVICULTURE

Bill Towell, 3rd yr. (Dr. Day)

Bill is studying the growth and yield patterns of *PICEA GLAUCA*, *P. GLAUCA* plantations, *POPULUS TREMULOIDES*, and mixed woods to determine the timing and aspen density at which competition between aspen and spruce begins. This data will be used to time herbicide application and hand release (cleaning) to release spruce.

Mark Harvey, 1st yr. (Dr. Day)

Mark is experimenting with various preconditioning and storage procedures for *PICEA GLAUCA* seedlings to quantify the effects on outplanting performance. Three methods of storage and the effects of wrenching (preconditioning) on the degree and timing of dormancy were evaluated. Spring planting is his final phase to determine wrenching effectiveness and the best storage method.

Craig Sutherland, 1st yr. (Dr. Day)

Craig is attempting to determine the optimum size and shape of container necessary for the production of high quality black spruce container seedlings. Twelve container sizes (4 volumes x 3 shapes) have been manufactured and will be used to test seedling growth in the greenhouse phase and after outplanting.

Mark Rosiek, 1st yr. (Clarke & Brown)

Mark's thesis is in conjunction with a project of Clarke & Brown, which has been on-going since June, '80. Factors that influence 'free-to-grow' status in *PICEA MARIANA* and *PINUS BANKSIANA* will be studied. 'Free-to-grow' refers to a certain height and growth rate of a stand when reestablished.

BIOMETRICS

Johanna Kavanagh, 3rd yr. (Murchison)

Johanna's research is comprised of a two-part study: 1) the development of two computer programs to process stem analysis data from Lakehead's digimicrometer. 2) the accuracy of volume estimates obtained using different sampling intensities for *PICEA GLAUCA*.

Randy Collier, 1st yr (Murchison)

Randy (last year's Harvest editor), is attempting to fit the Weibull distribution to yield data collected from a past project of L.U. This will provide *PICEA MARIANA* yield tables for N.W. Ontario. Take comfort Randy, Weibulls wobble but they don't fall down.

HARVESTING

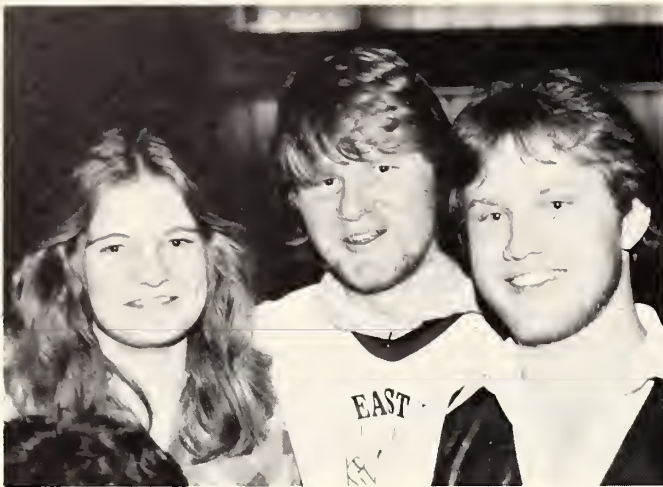

Dave Thompson, 3rd yr. (G.L.F.P.)

In cooperation with Great Lakes F.P., Dave is evaluating the line transect method as an inventory technique for estimating the amount of forest residue remaining in a cutover. This efficient method is important for better wood utilization and for measuring fuel, but has never been tested in Ontario before.

FISH AND WILDLIFE

Bill Dalton, 3rd yr. (Cumming)

Bill is studying the foraging patterns of beaver in poplar stands to determine their efficiency according to the optimal foraging theory. (energy minimization, food maximization, predator avoidance, etc. ...)

Let's talk teamwork.

At Great Lakes Forest Products we have a team of 5700 persons. They are engaged in timber harvesting, reforestation and the production of newsprint, kraft pulp, fine paper, lumber and waferply.

The careers involved range from engineering and mechanical trades, to accounting and personnel. To maintain an operation as complex as this, a wide variety of occupations is essential. Your skills may one day become a welcome addition to our industry.

THE FIRST ANNUAL FORESTRY FOLK NIGHT

The combination of talented foresters, professors and special guests proved to make our first Folk Night a great success. Richard Zotz kept the evening rolling with his witty comments and charm. Entertainment ranged from the foot stomping sounds of Dean Hemple's quartet to the mellow tunes of Jeff Glantz. Peggy Knowles demonstrated her pianist abilities, while Harold Cumming captivated the audience with forestry songs.

Through the sale of baked goods, \$160.00 was raised for the Woodsmen Team. Special thanks to our guests Annie Merlin, Slipt Disque, to the many performers and to everyone who contributed to the evening.

The Intramural Woodsmen Competition

On Saturday morning January 15, 11 teams descended on the Woodsmen field ready for a good time. Thanks to Mark Bancroft and his crew, the day was a great success. Bogie's raider's walked away with the Men's first place, Dar's Darlings captured the Women's title and Rob MacAlpine's team won the co-ed division. Thanks to Ray and Maureen for providing pop and hot dogs.

The For Every Child A Tree Program came to Lakehead University this fall. The program which was initiated as a United Nations Environment Programme endeavor, is being promoted in Canada by The Canadian Foundation For World Development. The CFWD has launched a nation wide campaign to plant trees in Canada. The UN has asked Canadians to raise money for the growing of nursery stock in Haiti, a country that is 91% deforested. LUFA members have raised over \$200.00 for this purpose through the sales of buttons, mugs and T-shirts. We have also been in contact with several schools who have expressed an interest in participating in tree planting projects.

Forest Management in Ontario Symposium

Ready Or Not!!

THE COMMITTEE: Rick Lambert, Simon Tanner, Leslie Hawkins, Chris Cohlmeier.

fry

PANEL: P. Corbett, R. Monzon, A. Currie, G. Patterson, J. McNicol, S. Courtney.

dwi

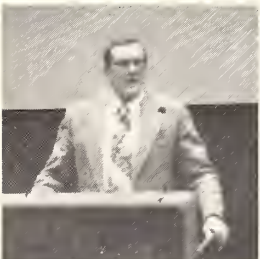

The CIF held their 75th anniversary this year and the Northwestern Ontario section allied themselves with LUFA to produce the 15th Annual Symposium. The theme was "The Managed Forest in Ontario, Are We Ready?". The seminars were aimed at the public, a group which seems determined to ignore things that are in their own interest. However the different format of the sessions, the speakers, and the interest of the audience all combined to make the symposium a success. Our speakers told us where we are in management right now and why, and that if we start using the plans and techniques now becoming available we may have a well managed forest someday.

The Dinner and Dance was held this year at the Holiday Inn and approximately 130 people stuffed themselves on roast beef. Tom Krickl, a transplant, remembered field school for us, although perhaps not precisely as we remember it, and Fat Chance had everyone rocking and polkaing for the third year in a row. Many thanks to the committee members from both LUFA and the CIF for their efforts.

The Woodsmen

R.N. PICKARD
1982

rw

John Andres

Ron Solecki

Ray Wagner

During the 1982-83 year Lakehead Woodsmen participated in three competitions: November - Sir Sandford Fleming College; January - McDonald College; March - Lakehead U.

At the SSFC competition LU 'A' placed 7th out of 16 teams while taking a 1st in swede saw and pulp toss for distance. LU 'C' team placed 13th overall. In Montreal, LU 'A' again placed 7th out of 19 teams while winning a 1st in swede saw, 2nd in overall sawing, and two 3rd place finishes in log decking, and dot splitting. At our own Lakehead competition, LU 'A' placed 2nd out of the 10 participating teams while winning again swede saw and placing 3rd in six other events - waterboil, decking, crosscut, speed chopping, chainthrow, and pulp toss. However, in the women's division, LU 'C' walked off with ten first place finishes in 1/4 split, pulp throw for distance, axe throw, log decking, power saw, crosscut, speed chopping, chain throw, swede saw, and pulp toss for distance. LU 'C' placed first in the

The Ring Ceremony

On March 11, 1983, the fourth year class received their forestry rings from the C.I.F. According to the June 1974 issue of the Forestry Chronicle, the ring signifies: accomplishment in studies, dedication to a profession with high standards and aspirations to positions of responsibility. Paul Phillips was the valedictorian and gave his own special meaning to the ring. Herb Bax, a past graduate of L.U. was the presenter. Everyone enjoyed themselves during the evening at the Airline Hotel.

A Few Words from the Editor

Another yearbook is now history. Harvest '83 is a record that documents one year in the life of Lakehead University Forestry students. This edition is the eleventh one printed. As you look through the pages, I hope that it will bring a few smiles and chuckles to your lips.

I believe that the most important component of this school of forestry is the people. In a production like this, it is impossible to get pictures of everyone. Somebody always manages to elude the class photographer. Tech transfer students are especially hard to track down. Perhaps if your picture isn't with the class, it is among one of the candid. My apologies to those people who didn't make it into the yearbook.

A lot of hard work went into the production of "Harvest '83". We have big steps to follow. The 1981 edition of "Harvest", which was edited by Mark Stevens (who was voted Forester-of-the-Year in 1982), won an award from the American Society of Foresters. We hope to keep up the tradition.

There is too much work for one person alone, but as you can see from the facing page, I had lots of help. Ray Wagner spent many hours in the darkroom developing high quality photos; Teresa Holla faithfully typed everything I gave her (she will be the editor for Harvest '84); Peter Hanmore took most of the pictures; friendly Darlene O'Brien chased after new advertisers; Susanna Grimes took the initiative to do a survey of summer jobs; Margaret Penner kept track of all the money; Leslie Hawkins did a bit of everything; Peter Harper helped out whenever he could find the time. Many other people also contributed their time and talents, just look at the list of photographers. Then there are the artists, the class reps who sold books, and people who just came up with some neat ideas. Me, I just puttered around and told everyone else what to do so I wouldn't have to do anything.

Enjoy your yearbook.

Frances R. Youck.
